The *Total-Lift Bed™*

THE NEXT STEP IN HOSPITAL BEDS

The *Total-Lift Bed™* Advantage

The *Total-Lift Bed* sets a new standard in user and care-giver safety and comfort. The revolutionary design allows users to independently get out of bed and reduces the risk of work-related injuries to care-givers and staff.

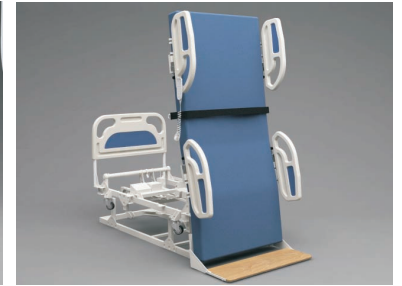

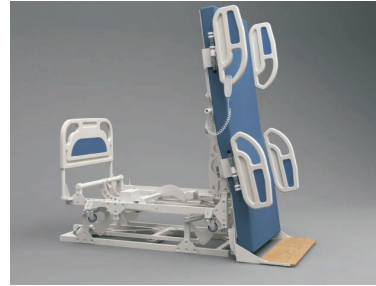

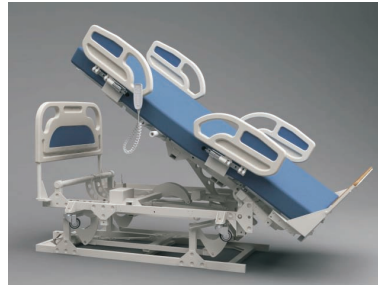

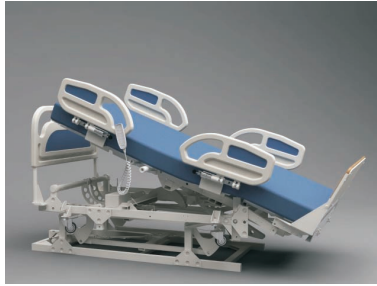

Ideal for Hospitals and Institutions

Early Ambulation

Hospital Administrators, Insurance Companies and good clinical practices require early post-op ambulation. Too often, the difficulty in getting post-op patients in and out of bed results in post-op complications, poor healing, staff and patient injuries. We have solved this problem for many patients with the ability to ambulate.

Movement of the *Total-Lift Bed™*

The Total Lift Bed takes the patient safely and quietly from 180 degrees to a standing position without any lifting on the part of staff or any exertion by the patient. Our patented technology gently raises the patient to an standing position. When the patient is at a standing position the caregiver can assist the patient in beginning ambulation.

Nursing Homes

- Generates new patients
- Works well in Rehab Department
- Multiple uses for Nursing Department
- Addresses various complications resulting from immobility

Hospitals

- Perfect for addressing minimal lift concerns
- Integrates with patient safe handling programs
- Reduces Staff and Patient Injuries
- Specialty Bed for Post Op Cardio and Joint Replacement Surgeries

Homecare

- Allows patients to stay home
- Can avoid costs of entering a rehab facility
- Profitable short term rental for post op patients
- Perfect for immobile patients living at home

OSHA Concerns

Your hospital is equipped with the latest and best of hospital bed technology. However, despite advancements in hospital bed technology your staff is still required to turn and lift a patient. OSHA has designated nursing as a high risk profession for back and other injuries. New Medicare regulations penalize hospitals for patient injuries.

Clinical Applications

- ✓ Total Hip Replacement
- ✓ Total Knee Replacement
- ✓ Spinal Surgery
- ✓ Cardio-Thoracic Surgery
- ✓ Organ Transplantation
- ✓ Post Abdominal Surgery

A REVOLUTIONARY CONCEPT IN BARIATRIC BEDS

AVAILABLE JANUARY 2010

Lifting Capacity **800** pounds.

Available with either high quality 8" Bariatric Mattress • Accepts an 8" or 10" Air Loss Bariatric Mattress
Wheels into room 38" wide • Expands to 48" x 84" • Built in Scale for Weighing Patient • High Quality Construction
Comprehensive Safety Strapping System • Tilt Function to Achieve Unique Controlled Weight Bearing
